## ABOUT ME

Skilled in CI/CD, IaC, cloud infrastructure, and automation. Capable of independently designing cost-efficient, scalable, and secure systems. Strong in architecture planning, problem-solving, and cross-team collaboration. Focused on reliability, performance, and delivery speed

## EXPERIENCE

### NESS Technology, Ra'anana – DevOps Engineer

2024 - PRESENT

- Worked on multiple cloud projects, fully modernizing landing zones for enterprise clients. Build Terraform modules and CI/CD and Architectures Re/designed infrastructure for better security, scalability, and cost control. Made systems faster, safer, and cheaper to run. Also added AI tools to boost efficiency where needed.

## PROJECTS

### FlaskPipeline – GitHub

Using AWS EKS, CI with Jenkins and CD with GitHub Actions, managing updates with Ansible. I set up a GitOps workflow with ArgoCD and deployed AWS infrastructure with Terraform, complemented by monitoring via Grafana and Prometheus.

### DribbleData –GitHub

Flask-based microservices on AWS EKS with Helm, Terraform, and GitHub Actions CI/CD. Includes Trivy scans, Fluent Bit logs, NoSQL, backups, and CloudFront.
