EXPERIENCE

- DevOps Engineer

Sep 2025 — Present

Compie Technologies · Ramat Gan, Israel · Hybrid

Bank Hapoalim

Platform team: Torque (Quali) environment automation, GitLab CI pipelines, EKS cluster management and various infrastructure automations.

Mapi

Landing Zone architecture: Central API Gateway, Shared Core Endpoints, Central S3 with STS-based cross-account access, and multi-account AWS setup with Terraform.

Topocad

GIS platform on AWS: full infrastructure with Terraform, Bitbucket Pipelines CI/CD, ECS microservices deployment and orchestration.

Ministry of Transport

Maslulan (Moovit-like web app): end-to-end infrastructure deployment, centralized logging, monitoring stack, and full CI/CD pipelines.

Ministry of Justice

Platform automations using Torque (Quali) and Terraform for environment provisioning and governance workflows.
- DevOps Engineer

Sep 2024 — Sep 2025

Ness Technology · Ra'anana, Israel

Shikun Binui

Designed cloud architecture from scratch on AWS, provisioned full infrastructure with Terraform and GitHub Actions CI/CD.

Managed and enforced AWS Service Control Policies (SCP) across multi-account organization for governance and security compliance.

Worked closely with Security team to harden infrastructure, implement IAM best practices, and ensure compliance across environments.

PROJECTS

- Fivory — Habit & Productivity App

fivory.net · App Store · Google Play

Flutter · AWS Lambda · API Gateway · DynamoDB · Cognito · S3 · CloudFront · iOS · Android

Habit and productivity tracker with 500+ active users on iOS and Android. Architected and deployed a fully serverless, secure AWS backend with IAM least-privilege access — built and shipped end-to-end as a solo founder.
- Obsid Workout — Push-up Training App

obsid.click · App Store · Google Play

Flutter · AWS Lambda · API Gateway · DynamoDB · Cognito · S3 · CloudFront · iOS · Android

Push-up training app with custom workout plans, streak tracking, and body progress on iOS and Android. Secure serverless AWS backend with global CDN delivery via CloudFront — fully built and deployed solo.
- FlaskPipeline

github.com/MatveyGuralskiy

AWS EKS · Jenkins · GitHub Actions · ArgoCD · Ansible · Terraform · Grafana · Prometheus

Production-grade GitOps pipeline for a Flask app — CI with Jenkins, CD via GitHub Actions, GitOps with ArgoCD, IaC with Terraform, full observability stack.

- DribbleData

github.com/MatveyGuralskiy

AWS EKS · Helm · Terraform · GitHub Actions · Fluent Bit · CloudFront · NoSQL

Flask microservices on AWS EKS with CI/CD, Trivy security scans, Fluent Bit logging, NoSQL, backups, and CloudFront CDN.
